

FiTs II Fiber Installation Tools

FiTs II
Video on YouTube

The Fiber Installation Tools (FiTs II) is an instrument providing optical stable light sources and optical power meters. The universal main frame provides up to 4 channels accordingly for installing power meter and light source module. FiTs II is an ideal optical test hub for field and laboratory testing of optical network with the interchangeable modules. It can also go with the app which will make the testing more efficient and flexible.

APPLICATIONS

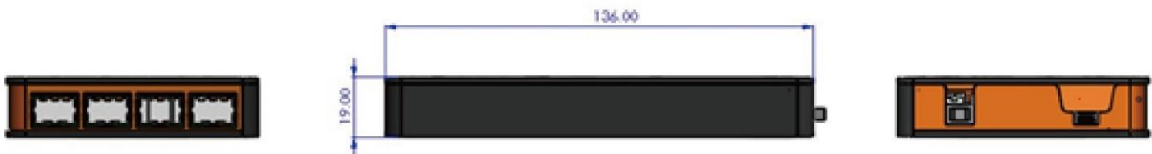

- ▶ Maintenance of CATV / Telecom / FTTH fiber optical networks
- ▶ Standard laboratory application
- ▶ Passive component fabrication
- ▶ Optical fiber network traffic monitoring systems
- ▶ Optical analog sensing system

FEATURES

- ▶ Pocket-size, low cost & rugged design
- ▶ Optional Power Meter and Light Source module with SC connector
- ▶ Optical power meter measurement range: +5 ~ -70 dBm
- ▶ Adjustable optical power: +3 / 0 / -3 dBm
- ▶ Hot swapping light source and power meter module
- ▶ Simple USB interface with friendly graphical user interface (GUI)
- ▶ Bluetooth transmission
- ▶ Support app connection with Bluetooth

DIMENSIONS

Specifications

Operating Temp.	0°C~ 50°C
Storage Temp	-20°C~ 70°C
Resolution	0.01 dB
Accuracy for Singlemode	±0.3dB under calibrated condition
Accuracy for Multimode	±0.5dB under calibrated condition
Power Supply	100~240VAC / 50,60Hz
Dimension	168 * 108 * 36 mm
Weight	0.5 Kg
