

SPECIALTY FIBER HIGHLY NONLINEAR FIBERS

ARTICLE HNLF (s/n Ge304)

HNLF series is designed to maximize fiber nonlinearity and minimize optical loss, which makes such fibers optimal for constructing highly efficient Raman lasers and amplifiers, dispersion compensators and various non-linear devices.

ARTICLE HNLF DS (s/n Ge137)

HNLF DS series is designed for applications requiring a shift of the zero dispersion wavelength to the 1550 nm spectral region: supercontinuum generation, parametric conversion and etc.
