## 800 nm band Phase Modulators

The Exail NIR-MPX800 series are phase modulators especially designed to operate in the 800 nm wavelength band. They are available with various modulation bandwidth, from low frequency to 20 GHz and beyond.

Like all Exail Near InfraRed (NIR) modulators, the NIR-MPX800 series use a proton exchanged based waveguide process that confers them an unparalleled stability and a high photo-refractive threshold.
